N-SEA: INTEGRATED SUBSEA PARTNER

N-Sea is the leading provider of integrated subsea services to the global oil and gas and renewables industries.

We utilise our fleet of dive support vessels and specialist intervention craft to deliver a range of subsea services for marine-based rigs, platforms, FPSOs and renewables operations, with minimal impact on production.

With an experienced team of more than 300 subsea specialists, we have the breadth of capability and the teams in place to offer a rapid response, without compromising safety or quality.

Significant investment in our in-house technology, equipment and fleet means we can deliver flexible subsea solutions for the most technically challenging worksopes. For larger integrated projects our mother vessels and project teams provide combined intervention craft and vessel diving, ROV and survey services.

Our many years of experience and proven track record demonstrate that we can deliver innovative solutions safely, efficiently and cost-effectively. We are members of the International Marine Contractors Association and are committed to a safe service delivery in line with the highest industry standards.

We have developed a best-in-class, subsea specific initiative to ensure we maintain and build upon our excellent safety performance.

INTEGRATED SERVICES

We provide a range of integrated services to support underwater operations and ensure the safe and efficient delivery of complex subsea projects:

- Vessel based air and nitrox diving
 - Intervention daughtercraft air and nitrox diving
 - TUP diving system®
 - Survey
 - Inspection, repair and maintenance
 - Caisson & riser repair and maintenance
 - ROV - workclass and observation
 - Cathodic protection
 - Decommissioning
 - Wet welding
-

N-SEA: INTEGRATED SUBSEA PARTNER

HOW WE ADD VALUE

At N-Sea, it is our goal to add value wherever we operate. On subsea operations, we add value in the following key ways:

- We ensure best practice in safety
- Innovative solutions to maximise the productivity of your assets - eg. mother/daughter craft, deployment of state-of-the-art RHIB vessels and LARs
- Careful planning ensures we are proactive in presenting value-added solutions
- Access to complementary services and the use of multi-disciplinary teams to help minimise project costs
- We provide a rapid response without any compromise on safety or quality
- We hold comprehensive equipment stocks, and can provide clients with technical support, including design solutions for special bolting applications

COMMITTED TO TECHNICAL INNOVATION

We are committed to developing and introducing technical innovations that help us to deliver significant safety and efficiency benefits on subsea projects. These include:

- MCA cat 1 & 2 certified dive intervention craft
- Hydraulic flange pulling tools
- Subsea bolt tensioning spread
- Advanced NDT
- Retrofit cathodic protection systems
- Wireless cathodic protection monitoring

N-Sea has recently invested in a new state of the art facility which houses the company's extensive fleet of dive intervention craft and technology and a bespoke dive test facility for the calibration and certification of specialist equipment.

COMMITTED TO SAFETY AND EXCELLENCE

As a leading support partner, working with operators throughout the asset lifecycle, we are committed to delivering world-class safety performance across our global subsea operations.

N-Sea's policy is to present customers a safe, sound and swift solution by offering a professional, cost effective and high quality service where safety, health, environmental and quality factors are prioritised.

By placing safety unequivocally as our number one priority, we consistently deliver complex subsea worksopes and projects to the highest safety standards without compromising quality.

N-SEA: INTEGRATED SUBSEA PARTNER

OUR CLIENTS

“Safety excellence is at the heart of everything we do. We have a robust safety culture that demands the application of outstanding performance and behaviours to operate in challenging environments and applying the highest safety standards is a key driver to ensure that our operations are performed safe, sound and swift”

Roddy James
COO, N-Sea

We have successfully completed subsea projects for a wide range of clients worldwide. These include:

Apache / BG Group / BP / Chevron /
ConocoPhillips / Maersk Oil / Marathon /
OIS / Petrofac / Repsol / Shell / Subsea7 /
Technip FMC / Repsol Sinopec /
Teekay Petrojarl / Tennet Offshore /
Nord Stream / Perenco
EON Renewables / Wintershall
